

Applied Behavioral Analysis (ABA)

Wall Therapeutic Solutions offers progressive and compassionate Applied Behavioral Analysis (ABA) for individuals with autism and other developmental disabilities. Wall Therapeutic Solutions never seeks to stifle or change someone's neurodiversity. Instead, we provide children the opportunity to explore new skills and learn to interact with peers in a relaxed and engaging way in a natural environment. Our individualized treatment programs support children/youth up to age 21 and their families to overcome obstacles and create foundations for future success. We accept both commercial insurance and Medicaid.
